

CDC Short Course (5 days)
Diabetes Public Health and Research
Centers for Disease Control and Prevention
Division of Diabetes Translation
Atlanta, Georgia, USA

This 5-day course will provide basic training in diabetes public health, translation research, and economics. The course will help create a national and international network of collaborators who have basic training in diabetes translation research and economics.

Objectives

Familiarize students with

- diabetes epidemiology
- standardized measurement(s) of the public health burden of diabetes
- the rationale, concept, and methods used in translation research, health economics, social and behavioral research, and community-based interventions and programs.

Help students develop skills in diabetes public health and translation research.

Eligibility

Twenty students will be selected to participate. Students must have a background in at least one of the following: public health higher education, a U.S. state diabetes prevention and control program, or programs overseas, such as the World Health Organization or similar experience.

The minimum eligibility requirement is a master's of public health degree or equivalent or at least 2 years experience in public health research within the previous 5 years. Please provide some evidence (courses, published papers) of research training in a relevant discipline, such as epidemiology, statistics, health services research, health economics, or sociology, or have earned an MD or PhD degree.

Dates: October 20 - 24, 2003. Deadline to apply is June 7, 2003.

Location: D. Abbot Turner Center, Emory University Campus, 1703 Clifton Road NE Atlanta, GA 30322

Fees: Students will pay their own travel and local expenses, but there is no tuition fee.
